REMARKS - BRIEFING

SECOND CAR

SETUP and MODIFY

PROVA SETUP

Any setup car is entered here before the start of the first session

Attention to copy it from your setup unfortunately access 2.0 does not allow you to copy and paste:

after selecting the text to copy :

Use the classic CTRL / C system to copy

and CTRL / V to paste

This field is never cleared at the start of the session, which is the case for observations.

Every weekend the setup of the test track is inserted here, which then during the other sessions will eventually be corrected.

This is to have the car setup in any case during all the weekend sessions for that track.
